Sensitive paints work best when applied over a regular (Titanium Dioxide) white surface

Fluorescent Colors

Eight Fluorescent Colors, More Brilliant with UV, 100% Acrylic Paint. Premier quality scenic paint, combined with state-of-the-art pigmentation. Super-saturated precision balanced formulas for maximum fluorescent brightness, without white-light-to-black light color shift. 100% acrylic base assures a tough, durable flat finish. Inter-mixable for a rainbow of fluorescent hues. Superb coverage and opacity, even thinned with water. Ideal for spray, hard-brush application. Safe, water base formula, non-toxic. Available in 9 colors and White (see below.)

Fluorescent paints are bright-fluorescent colored under white light and become even brighter under UV lighting

Reg White

TE: Reg. White can be very slightly blue, green or yellow depending on the batch and yo hting source. This is our best shot without going to the extrememly expensive pigments True White. Please order from the same batch to insure consistancy. White is also "She ich means it is more translucent than opaque. It does not have much hiding ability. Plea a white (Titanium Dioxide) base.
