**About Oil Based Clay**

Oil based clay will not dry out, but it will oxidize over time and become difficult to work. Sometimes you can manipulate the consistency of the clay by mixing it with petroleum jelly, but this is hard work. Some oil based clays like Plastina contain sulphur and can't be used with silicone molding compounds. Plastina can be sealed with a coating of sealer or shellac but any coating of this type will take away some of the details of your sculpture. We recommend and use our Klean clay which is easy to work and won't react with silicones. Some oil based clays can be melted and poured into a mold. Preheating oil based clay will soften it and make it easy to work. A pound of Klean clay is about 3 3/4" x 7/8" x 5 3/8."

**Buying Guide**

If you are working on a large sculpture and need control over the finish, such as a pattern for a car, statue or other critical project get Klean Clay. If you are doing smaller projects, where softness is not an issue, or if you are using the clay to melt down to pour into a lifecasting mold then get the Modeling Clay. If you are doing clay animation get Modeling clay, which comes in colors. If you are making very small projects that need to be hardened by baking then get the Sculpty III, which also comes in colors.

**Klean Clay is fading away.**

You probably heard rumblings in the industry that our Klean Clay is being discontinued. These rumors are true. The old gentleman who made it is retiring. He has sold his equipment and formulas to a friendly competitor. We are working with the new owners to get the new clay. We should have the replacement for Klean Clay soon. It will not exactly be the same, but it will be sulfur free. It will most likely cost more money. Thanks for your patience during this transition. SB

**Klean Clay**

For larger, professional projects

~~1404 Klean Clay, 1 lb bar, Nat. Firm~~ ~~—————~~ ~~\$3.50~~

Klean Clay in Bulk, 50 lb. box.

Specify Color - Natural or Brown

Specify Hardness - Extra Firm, Firm, Regular, Soft.

~~KLAY 50 Klean Clay, Bulk, 50 lb. box~~ ~~—————~~ ~~\$125.00 S~~

**Modeling Clay**

Sulfur free. Can be melted to a liquid and poured into a mold including alginate. Unless you specify, a neutral color such as flesh, tan, grey or the like will be shipped. Very soft.

### Sculpey III Polymer Clay

About Oven Bake Polymer Clay

Sculpey III clay has the same excellent handling qualities of Sculpey and Super Sculpey, combined with the dimension of color. It bakes to hardness in a 275 degree Fahrenheit oven in 15 to 20 minutes. A finish can be applied with Sculpey Glaze in either gloss or matte. Sculpey III is an excellent medium for jewelry, maquettes and miniatures. Once baked, its hardness makes it great for making a two-part silicone mold. The bars are small so pay attention to the 2 oz (56g) size. Dimensions of each bar are about 1 3/4" x 3/4" x 2 1/4"

Sculpey III Oven Bake Polymer Clay, 2 oz Bar (56g)

Specify your color choice from the following; White, Trans, Green, Sweet Potato, Black, Chocolate, Blue, Yellow, Red, Beige, Pearl, Pink Pearl, Lt Blue Pearl, Lilac, Blue, Green, Copper, Red Gold, Gold, Silver, Tan, Dusty Rose, Teal, Lavender, Leaf Green, Emerald, Terra Cotta, Navy Blue, Maroon, Coral, Ivory, Hot Pink, Turquoise, Purple, Violet, Lime, Mint, Atomic Orange, Lemon, Red Hot Red.

SKLP3 Sculpey III Clay bar, 2 oz \$2.00

Sculpey III, 30 Color Sampler

A nice place to start if you can't make up your mind. Includes 30 1 oz (29g) bars in a wide range of regular, bright, fluorescent and iridescent colors. Note that the size of the bar is 1/2 of the SKLP3.

PQS330-1 Sculpey III Sampler \$24.95

### Water Based Clay

Water based clay is simply that, clay mixed with water. It is usually very inexpensive but must be kept covered or it will dry out. Water based clay is easy to work when it has just the right amount of water, which is easy to manipulate. It is easy to remove from a mold with a water sprayer. Its disadvantages are equal to its advantages; it is often hard to control especially if project goes into many days, it sags and separates easy, and it can't be used with plastics, epoxies or polymers.

Crayola White Air Dry Clay

ADCLAY-2 Air Dry Clay 2.5 lb bucket \$7.50

ADCLAY-25 Air Dry Clay 25 lb bulk \$52.25

Moist Clay

MCLAY-5 Moist Clay 5 lbs \$12.95

MCLAY-25 Moist Clay 25 lbs \$17.95

Mexican Pottery Clay

MEX-2 Mexican Pottery Clay 2 lbs \$8.69

MEX-25 Mexican Pottery Clay 25 lbs \$38.95
