

**PRICE LIST  
UV Fluorescent Paint  
Prices Effective 5-1-2007  
www.fxsupply.com/uv/uvpaint.html**

UV Sensitive paints work best when applied over a regular (Titanium Dioxide) white surface.

**UV Fluorescent Colors**

Bright Fluorescent Colors, More Brilliant with UV, 100% Acrylic Paint. Premier quality scenic base paint, combined with state-of-the-art pigmentation. Super-saturated precision balanced pigment formulas for maximum fluorescent brightness, without white-light-to-black light color shift. High density 100% acrylic base assures a tough, durable flat finish. Inter-mix for a rainbow of fluorescent hues. Superb coverage and opacity, even thinned with water. Ideal for spray, airbrush or hard brush application. Safe, water base formula, non-toxic. Available in 9 colors and White (see below.)

Fluorescent paints are bright-fluorescent colored under white light and become even brighter under UV lighting

**UV Reg White**

NOTE: Reg. White can be very slightly blue, green or yellow depending on the batch and your lighting source. This is our best shot without going to the extremely expensive pigments used in the True White. Please order from the same batch to insure consistency. White is also "Sheer" which means it is more translucent than opaque. It does not have much hiding ability. Please use on a white (Titanium Dioxide) base.
